Option 2: Easy To Install UVC Wall Mount Bacteria and Virus Killing Lamp

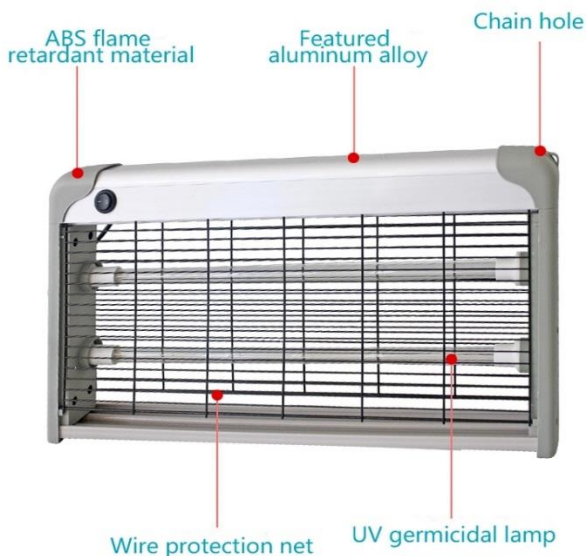

Helps Disinfect Viruses and Bacteria Including Flu, Corona, MRSA, Staph, Strep, Cdiff and More... "Turn On The Blue"

WALL-MOUNTED UV GERMICIDAL LAMP

- ✓ Switch models,
- ✓ Switch timing delay,
- ✓ Remote timing
- ✓ Remote timing touch

SHOW DETAILS

40W UVC Night Time Virus Killing Lighting. Put on a timer for about 30 minutes each night. Anti-Germicidal Light Kills Bacteria and Viruses. No One Should Be In Room

Applications

Medical office buildings, dentist offices, Bathrooms, Bedrooms, family, office, hospitals, doctor's office, laundry, kitchen, daycare, schools, restaurants, grocery, cart corrals, gas stations and more...

At certain wavelengths UVC is mutagenic to bacteria, viruses and other micro-organisms. At a wavelength of 2,537 Angstroms (254 nm) UVC will break the molecular bonds within micro-organismal DNA, producing thymine dimers in their DNA thereby destroying them, rendering them harmless or prohibiting growth and reproduction. The findings suggest that use of overhead UVC light in hospitals, doctors' offices, schools, airports, airplanes, and other public spaces could provide a powerful check on seasonal influenza epidemics, as well as influenza pandemics.
